

Advantages of Oral BPC-157

BPC-157 is stable in the gastric (stomach) environment and is absorbed systematically, reaching target issues throughout the body, including the lower extremities.

Patient Compliance

- No injection anxiety and no barriers to adherence. Can be administered daily or every other day.

Cost-Effective

- Easy administration and reduced overall treatment costs.

Systemic Benefits

- Oral BPC-157 addresses gut health, reduces systemic inflammation and supports overall healing capacity- benefits that extend beyond the foot or ankle.

Broad Application

- Oral BPC-157 is ideal for patients with any inflammatory or musculoskeletal conditions.

We are with you every step of the way

BPC-157 Peptide Therapy

Better Healing

Better Activity

Supporting your body's natural ability to heal, repair, and get you back to doing what you love.

What is BPC-157?

BPC-157 (aka Body Protection Compound-157) is a synthetic peptide made from amino acids and is based on protective proteins naturally found in the human gastric juice.

Peptides act as signaling messengers that help cells communicate during healing and repair.

How BPC-157 works?

- Increases blood flow to damaged tissue - critical for wound healing and post-surgical recovery
- Protects the gut lining against NSAID/alcohol-induced injury
- Reduces inflammation and tissue damage during healing
- Helps regulate inflammation
- Supports nerve and muscle healing after injury

Common Treated Conditions

- Plantar fasciitis
- Tendinitis
- Ligament sprains
- Sports injuries
- Musculoskeletal conditions
- Slow-healing wounds
- Diabetic foot ulcers
- Post-operative swelling and pain

Clinical Evidence & Case Observations

Podiatrists have documented encouraging results when BPC-157 is used as part of a complete treatment plan.

Diabetic Ulcer

- Accelerated angiogenesis and tissue healing
- Better wound closure

65 year-old male with DFU, Mild PAD and venous insufficiency - 1 week after BPC-157

- Decreased wound size
- Reduced inflammation and edema
- Improved granulation tissue

Post-Surgical Recovery

- Reduced post-operative swelling and edema
- Faster recovery progression
- Sooner return to activity

IMPORTANT

BPC-157 is part of a personalized regenerative treatment plan.

It works best when combined with:

- Wound care
- Surgery
- Rehabilitation
- Offloading
- Nutrition & blood sugar control

LIFESTYLE SUPPORTS BETTER OUTCOMES

Healthy Nutrition

Sleep and Recovery

Physical Therapy

Proper Footwear

Stable Blood Sugar
