

**WE CARE  
ABOUT YOUR  
QUALITY OF  
LIFE!**

## **YOUR SAFETY IS OUR PRIORITY**

DPMx is recovered and processed by an FDA registered, and CGMP (Current Good Manufacturing Practice) certified, and AATB Accredited manufacturing facility that only accepts bio-ethically donated birth tissue from healthy consenting mothers who have passed a comprehensive medical background checks, including genetic testing, blood screenings, and are full-term, live, C-section births

The Podiatric Advantage

## THE DPMX ADVANTAGE

DPMx is minimally manipulated, DMSO- free, human birth tissue allografts derived from the umbilical cord. These structural tissues contain both extracellular matrix, such as elastin, hyaluronan, connective tissue, Acid mucopolysaccharides, glycosaminoglycans, and naturally occurring tissue components.

## YOUR FOOT SUPPORT FIRST

DPMx may encourage the tissue's ability to withstand stressful forces by replacing the lost cushioning that originally supported the foot.

DPMx Allograft supplements missing tissue to encourage cushioning.

## PUT YOUR BEST FOOT FORWARD

DPMx tissue allograft is minimally manipulated to maintain the naturally occurring structural characteristics of the tissue to support your quality of life.

DPMx is manufactured using a proprietary technique that maintains the integrity of the tissue using innovative cryo-preservation processing.
